All employment is decided on the basis of qualifications, merit and business need.

Position Overview

Job Summary:
Under general supervision, the MS-SQL Database Developer designs and manages databases, writes optimal T-SQL queries, stored procedures, functions, and triggers; develops ETL packages using business intelligence tools; extract reports to files and automates file transfers; builds and publishes dashboards and reports. The incumbent also performs other job-related duties as assigned.

Essential Functions:
- **Proficient in database design concepts and database objects**
- **Responsible for designing and developing SQL databases**
- **Proficient in SSIS integration service and SQL Management Studio**
- **Proficient in writing T-SQL queries, stored procedures, functions, and triggers**
- **Responsible for import/export of data from cloud-based databases using API calls**
- **Responsible for developing procedures and scripts for database and data migration**
- **Responsible for extracting reports into files and automating file transfers**
- **Responsible for developing SSIS packages**
- **Responsible for developing and deploying SSRS reports**
- **Responsible for creating automated and on-demand jobs using SQL Server Agent**
- **Responsible for generating and publishing complex reports and dashboards**
- **Responsible for creating and using indexes to speed up SQL queries**
- **Analyze existing SQL queries for performance improvements**
- **Responsible for database documentation and cross-training IT personnel**

Minimum Qualifications:
- **Bachelor's degree from an accredited college or university with coursework in Computer Science or Management Information Systems**
- **Two (2) or more years of hands-on experience with MS SQL Server 2008 and later versions**
- **Two (2) or more years of hands-on experience writing T-SQL queries, stored procedures, functions, triggers**
- **Two (2) or more years of hands-on experience developing SQL Server Integration Services (SSIS) and ETL packages integrating internal and cloud-based databases and applications**
- **Two (2) or more years of experience creating and publishing reports and dashboards**
- **One (1) or more years of experience developing and deploying SSRS reports**

Preferred Qualifications:
- **Two (2) or more years of experience with PostgreSQL and LDAP**
- **Two (2) or more years of experience building reports and dashboards using Power BI or similar reporting tools**
- **Two (2) or more years of experience with Microsoft .NET technologies**
- **Two (2) or more years of experience with cloud databases**

The selected applicant must be authorized to work in the United States and must successfully pass a pre-employment criminal background check, motor vehicle records check and drug screen.

Due to the large volume of resumes received by this office, we are unable to provide information on your resume status over the telephone. Notifications will only be sent to applicants who are selected to interview.
