

ARRA - American Recovery & Reinvestment Act of 2009

Call Specifics

- Please use the chat feature on your web meeting to submit questions during our call
- Questions will be addressed intermittently during the call
- If you must leave please do not put the call on hold; you may subject everyone to music
- A recording of the call and supporting documents will be available after the call

Presenters

- David Godfrey, GEFA
- Danny Elijah, GSFIC
- Nathan Jones, GSFIC
- Rey Palma, GSFIC
- Andrew Ladd, GEFA
- PJ Newcomb, GEFA

Points To Cover

- Where we are in the process
- GEFA and GSFIC roles in the project
- Overview of the contracting process
- Introduction and overview to reporting
- Preview proposed measurement and verification components of the projects
- Review the timeline for funding distribution and contract completion

Where we are in the process

- Projects have been selected
- GEFA has obtained all of the funding
- GEFA and GSFIC signed an IAA
- GEFA and USG signed an IAA
- GSFIC will provide support to state agencies' approved for ARRA funding
- USG Facilities Office will admin USG funded projects

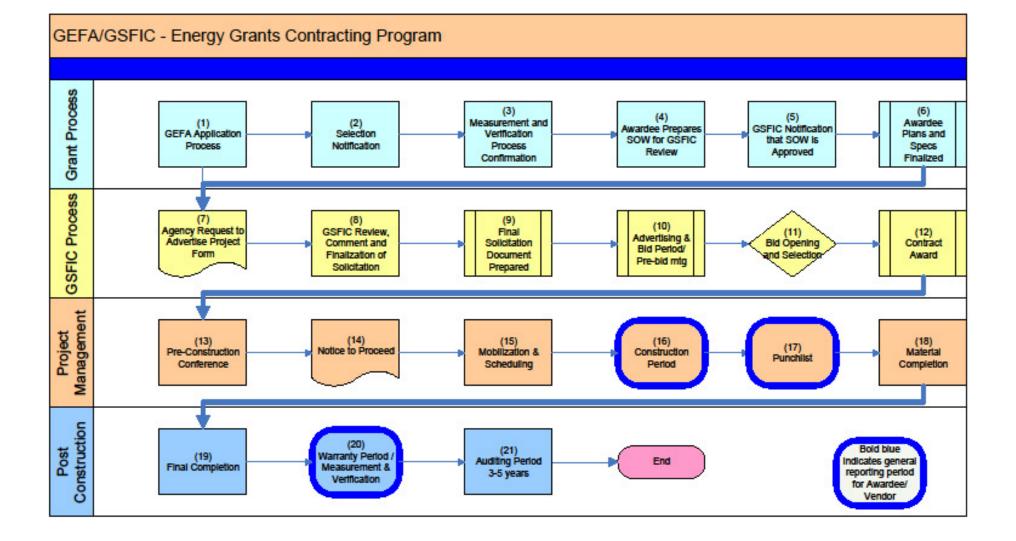

Basic Services

- GSFIC will provide procurement and project management services
- GSFIC will consult with agencies receiving ARRA awards from GEFA on the scope of the energy improvement projects.
- GSFIC will assess the potential for consolidating procurements and construction of similar projects among different agencies.

Basic Services

- GSFIC will consult with agencies for suggested design professionals and select according to established procedures and ARRA requirements.
- GSFIC will solicit competitive ITB, RFQ or RFP's.
- GSFIC will consult with Agencies for suggested vendors to receive bid notices.
- GSFIC will evaluate, and select vendors according to existing state procurement and ARRA guidelines/policies
- GSFIC will post all open solicitations to the Georgia Procurement Registry (GPR).

(3) Measurement & Verification Process Confirmation

- Coordinate through GEFA (ARRA funds can be used if requested in original application)
- Compliance with IPMVP and/or approved variation
- Agency can self perform M&V or contract out to vendor
- A preliminary M&V Plan will be reviewed by GSFIC in consultation with GEFA prior to execution of contract
- GEFA notifies Agency of approved preliminary plan

(4) Awardee Prepares SOW for GSFIC Review

- Draft Scope of Work (SOW) prepared by Agency for GSFIC review (ARRA funds can be used if requested in original application)
- Project allocation shall be all inclusive; no contingency above awarded amount
- Agency will include approved SOW in project manual

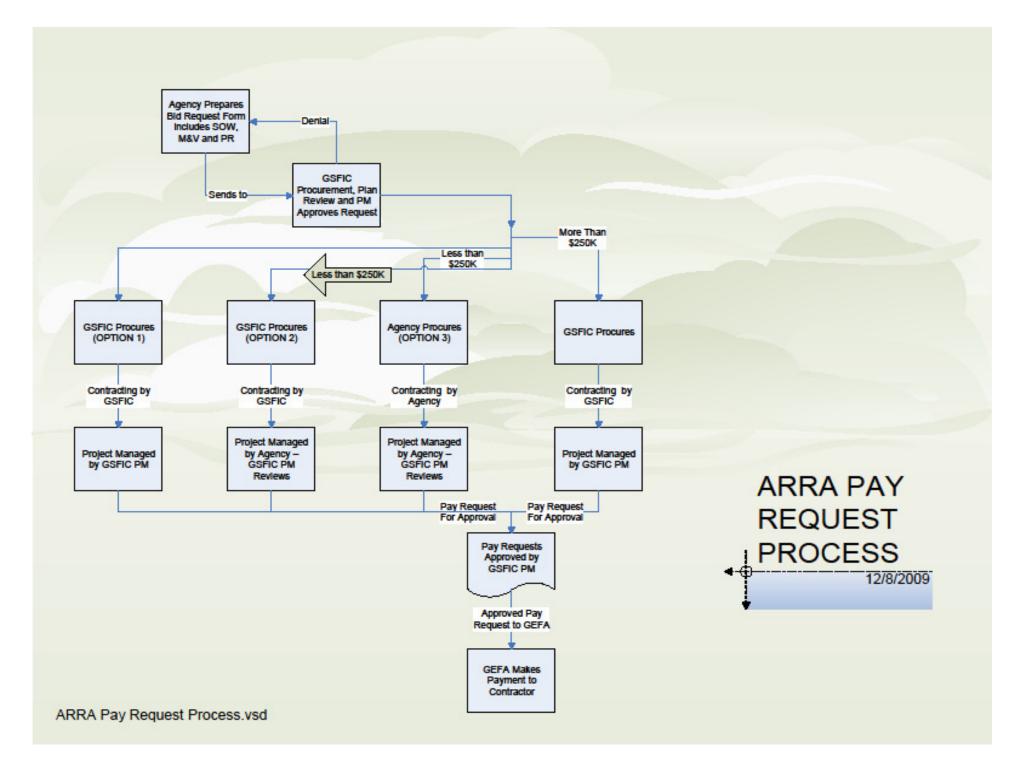

(6) Awardee Plans & Specs Final

- Fully complete plans and specs are sent to the GSFIC Design Review Group
- Plans and specs receive GSFIC approval

(7) Agency Project Request Form

- The "Agency Project Request Form" is completed by the Agency
- The form is submitted to Procurement with all required documents attached, e.g., SOW, Plans and Specs, Programming/Concept Docs, etc.
- This form will be made available shortly

(8) GSFIC Review, Comment and Finalization of Solicitation

- GSFIC will receive and process the requesting agency's full solicitation package
- GSFIC will ensure package compliance with ARRA requirements

(10) Advertising & Bid Period

- Projects will be advertised to the GPR Georgia Procurement Registry
- The bid period will generally be 30 consecutive calendar days unless otherwise allowed
- A pre-bid conference may be held
- Changes will be managed by addenda

(10) - Continued Advertising & Bid Period (Topics)

- Buy American
- Reporting Requirements
- DUNS
- CCR
- Copeland Act
- Davis Bacon

- Self-performance of work process
- Subcontracts
- Neutrality-Open Competition
- IG/DOE Audits
- Field Audits
- GSFIC Guidelines

(11) Bid Opening & Selection

- Bid openings will be publicly held
- Award shall be to the lowest, responsive, and responsible bidder
- Contracting shall be promptly after evaluation and confirmation of Awardee compliance with all ARRA requirements

(12) Contract Award

- GSFIC/Agency will prepare all contract documents for signature
- Contract will be between vendor/service provider and GEFA

(13) Pre-Construction Conference

- GSFIC will schedule and host the preconstruction conference
- ARRA compliance matters will be discussed
- Form of payment will be discussed
- Sub-Contractor use will be discussed

(16) Introduction and Overview of Reporting

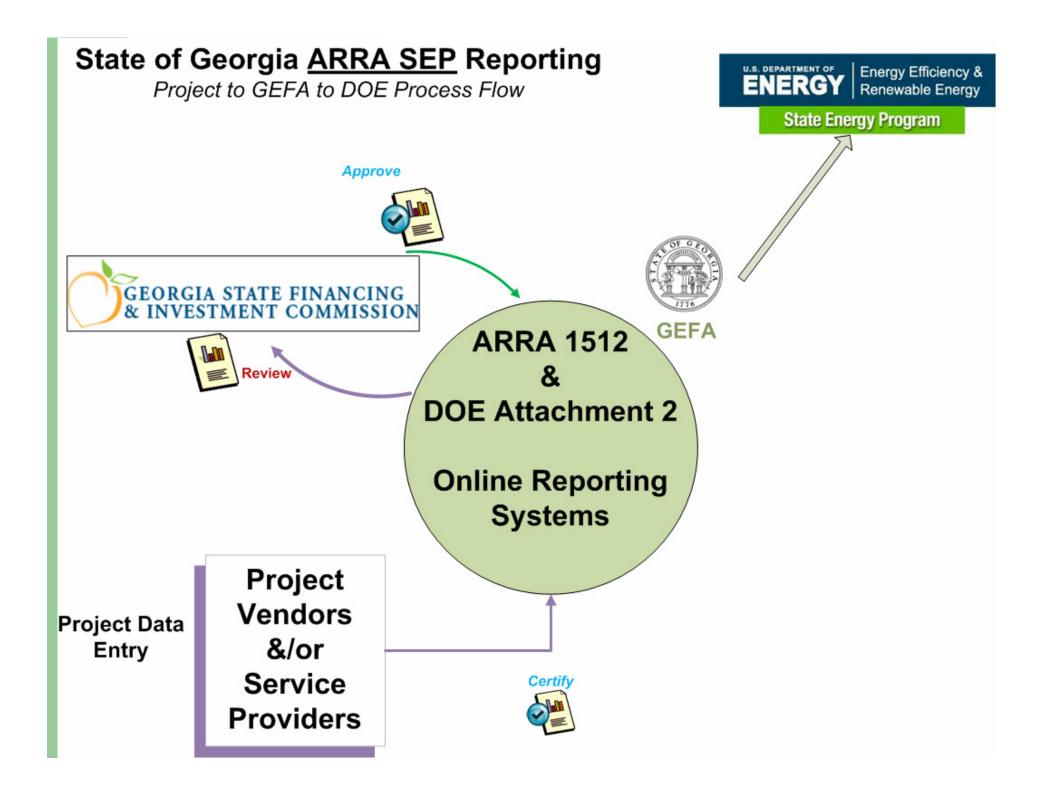

2 Reporting Avenues Required Quarterly

<u>ARRA – 1512</u> Due between the <u>1st & 5th</u> day after each quarter

Department of Energy - Attachment 2

Due between the <u>1st & **15**th</u> day after each quarter

Both will be done online from a web browser

(16) Introduction and Overview of Reporting

Reporting Data

Office of Management and Budget – 1512

- Jobs Created & Retained
- Total # and \$ Amount of payments made less than \$25,000
- In some cases, sub-recipient top 5 Officers Names and Compensation

- Each project or energy conservation measure awarded will need to include approved form of measurement and verification of energy savings
- International Performance Measurement and Verification Protocol (IPMVP) 2007
 - <u>International Performance Measurement and Verification</u> <u>Protocol (IPMVP)</u>

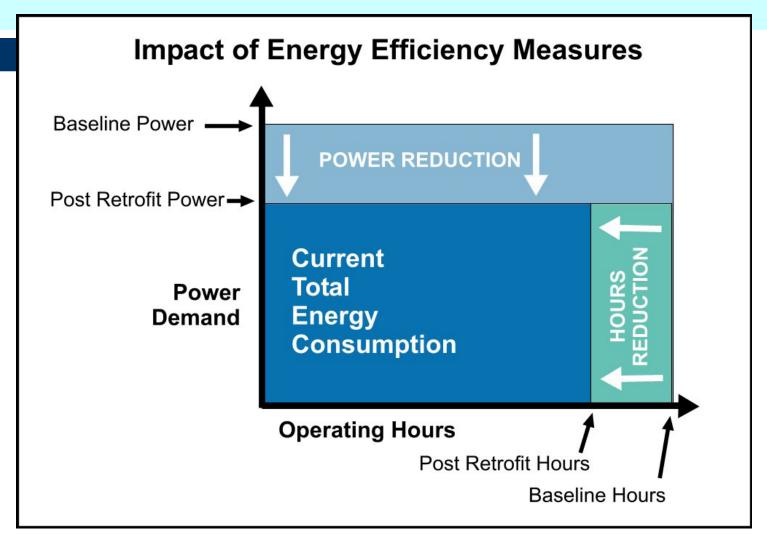

Energy Savings = (Baseline Energy Use) - (Post-Retrofit Energy Use) + /- (Adjustments)

Baseline Energy Use = (Baseline System Performance) x (Baseline Operating Hours)

Post-Retrofit Energy Use = (Post-Retrofit System Performance) x (Post-Retrofit Operating Hours)

Performance = efficiency or rate of energy use of
 system/equipment

Operating Hours = the total time that a system/piece of equipment runs

- Option A—Retrofit Isolation with Key Parameter Measurement
- **Option B**—Retrofit Isolation with All Parameter Measurement
- Option C Whole Bldg Utility Data Analysis
- **Option D**—Calibrated Computer Simulation

• Recommendations:

- ECMs with projected annual savings < \$10,000/yr can use engineering calculations instead of an official IPMVP method.
- Lighting projects typically **Option A**, perhaps **B**
- Medium and large controls (excl. metering) & mechanical projects within a single building or central plant: **Option B** (where practicable)
- Metering, Commissioning, Building Envelope, and Multi-building Controls projects: Option C (10% rule)

Self-performance M&V: requires agency to complete plan (may include GEFA/GSFIC assistance)

Procurement Services - RFPs should contain M&V requirements, specifically requesting:

• Preliminary/Proposed M&V Plan (including cost estimate)

Energy Savings Report is required under both methods of performance

Measurement and Verification (M&V) Plan

- 1. A description of the ECM and its intended result
- 2. Intended M&V option to be used
- 3. How baseline data will be determined
 - a) Parameters to be measured (also, when and for how long),
 - b) Parameters to be stipulated (agreed to, held constant)
 - c) How & why the baseline may be adjusted (weather, occupancy, etc.)
- 4. Measurement methods and equipment to be used
- 5. Schedule for all M&V activities
- 6. Who will conduct the M&V activities
- Commitment to providing <u>Energy Savings Report</u> methods, assumptions, calculations, and results of the M&V
- 8. Costs of M&V operations and equipment

Timeline

Sign IAA Nov 24
Contract templates finalized Early Dec
Vendor presentation Dec 15
Begin contracting the Work Mid Jan
All work to be completed NLT 3/31, 2012
